2020 Healthcare Economics Summit

Hosted by Remedium eXchange: A Healthcare Economics Think Tank

America spends more than any other developed country on healthcare, and yet does not provide better health outcomes.

Why is healthcare so expensive in America, and what is the solution to this out-of-control cost curve?

At this year's Healthcare Economics Summit, entitled Purple Solutions to Fix Healthcare in America, a collection of healthcare experts have come together to share their thoughts and expertise on how to reform healthcare in America. The solution to healthcare is in our hands as consumers and voters, not in the hands of big government or corporate medicine. Viable bipartisan solutions to healthcare reform are presented – we just need to change our mindset, and then convince our elected officials to compromise and work towards giving us better healthcare in America.

Participants receive a free copy of the book, Purple Solutions: A bipartisan roadmap to better healthcare in America and supporting materials, including content from the presentations, and helpful infographics that explain healthcare policy.

Attend the event virtually, and hear from book coauthors and other thought leaders, who our nationally recognized experts in healthcare policy from across the country.

Argument for a Limited Healthcare Safety Net

12:00 - 12:20 p.m.

Charlie Stevens, Partner, Michael Best; James Tarasovich, South Region CFO, Ascension-Wisconsin

Legal Considerations in Implementing Telehealth: From Large Providers to Disruptive Venture-Backed Startups
