

Adam J. Steslicki *

Patent Engineer

** Not admitted to practice law*

Overview

Adam assists with patent preparation and prosecution related to electrical and computer technologies.

He has particular experience with automotive technologies, gained from an internship with Ford Global Technologies. In this role, Adam helped to evaluate invention disclosures and conduct inventor interviews, as well as analyze patent portfolios for opportunities and threats.

Adam also worked as an intern for Michigan State University Technologies, the university's technology transfer and commercialization office, where he assisted with the evaluation of emerging technologies for commercialization potential.

Additionally, Adam participated in Michael Best's EDGE internship program where he gained experience in patent drafting, clearance, and prosecution strategy.

Education

- Michigan State University, Bachelor of Science (B.S.), 2020; Electrical Engineering
