

Taylor W. James *

Patent Agent

** Not admitted to practice law*

Overview

Taylor assists with domestic and international patent preparation and prosecution.

He began his career with Michael Best as an engineering intern. Taylor also served as an intern at Carlex Glass, where he worked with a team of engineers to design and implement systems to prevent automotive windshield breakage. Earlier, he was a research assistant in Rose-Hulman Institute's Department of Physics and Optical Engineering where he helped design equipment and conduct research to measure a material's color temperature. Taylor has deep experience with technologies related to optics, lighting and lighting systems, materials science, power equipment, and batteries and other power storage devices.

Education

- Rose-Hulman Institute of Technology, Bachelor of Science (B.S.), 2019; Mechanical Engineering

Admissions

- United States Patent and Trademark Office
